

OMKAR

Full Stack Developer — Data Engineering Enthusiast

☎ +91-6363108770 ✉ omkarswamy482@gmail.com 🔗 [linkedin.com/in/-omkar](https://www.linkedin.com/in/-omkar) 🐙 github.com/Omkar4112

Summary

Full Stack Developer and aspiring Data Engineer with hands-on experience building scalable backend systems, REST APIs, and AI-powered applications using Java, Spring Boot, PostgreSQL, and React.js. Familiar with ETL workflows, SQL optimization, data processing concepts, and distributed systems. Passionate about cloud technologies, data pipelines, and building efficient data-driven applications.

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL
- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Spring Boot, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MySQL
- **Big Data & ETL:** Apache Spark, ETL Concepts, Data Pipelines, Data Processing
- **Cloud & Tools:** Docker, Git, Postman, Vercel
- **Salesforce:** Apex, SOQL, Triggers, Lightning Web Components (LWC), Flows
- **AI / ML:** XGBoost, LSTM, NLP

Projects

VigilAI MedLink v2.0 — AI-Powered Healthcare Triage

[GitHub](#)

Spring Boot, React.js, PostgreSQL, XGBoost, Docker

- Designed scalable backend services for processing and managing healthcare data using Spring Boot and PostgreSQL
- Built RESTful APIs and implemented secure JWT-based authentication for real-time healthcare workflows
- Processed and analyzed structured healthcare datasets using XGBoost models for AI-driven risk prediction
- Containerized services using Docker Compose for efficient deployment and scalability

Smart Grid Energy Demand Prediction

[GitHub](#)

React.js, Node.js, Chart.js, LSTM, Machine Learning

- Developed an AI-based smart grid energy demand prediction system using LSTM models for time-series forecasting
- Processed and analyzed energy consumption datasets to predict future electricity demand and improve grid efficiency
- Built interactive dashboards and real-time visualizations using React.js and Chart.js for monitoring prediction insights
- Implemented backend services using Node.js for handling data processing and prediction workflows

Job Recruitment Portal — Salesforce CRM

Salesforce, Apex, SOQL, Lightning Web Components (LWC)

- Developed a recruitment management system using Apex, SOQL, and Lightning Web Components
- Automated applicant tracking workflows using Salesforce Flows and Triggers

Education

REVA University

Bengaluru, India

B.Tech in Computer Science Engineering | CGPA: 8.6/10

2023 – 2027

- Relevant Coursework: Data Structures, DBMS, Operating Systems, Big Data Analytics, Software Engineering

Achievements & Certifications

- **Winner — Datathon '25**, REVA University
- Oracle Databases for Developers Foundations — Oracle
- Introduction to Cloud Computing — Infosys Springboard
- ReactJS for Beginners — Simplilearn
- Responsive Web Design — freeCodeCamp
