Summary

Full Stack Developer specializing in React, Spring Boot, and Salesforce. Build production-grade applications with focus on REST API design, role-based access control, and scalable architecture. Strong track record delivering clean, performant code and real-world impact.

Technical Skills

Frontend: React, JavaScript, HTML, CSS

Backend: Java, Spring Boot, REST APIs, JWT Authentication

Database: PostgreSQL, MySQL

Salesforce: Apex, SOQL, Triggers, LWC, Flows, Data Modeling

Tools: Git, VS Code, Postman, Vercel

Projects

VigilAI MedLink — Healthcare Full Stack Platform

[Live](#) | [GitHub](#)

- Architected full-stack platform for patient/doctor workflows using React and Spring Boot
- Implemented secure authentication and Role-Based Access Control (RBAC) for multi-user access
- Built 15+ RESTful APIs with PostgreSQL integration and structured request/response handling
- Deployed frontend on Vercel with cloud backend infrastructure for production accessibility

SaaS Admin Dashboard — Multi-tenant Platform

- Engineered modular admin dashboard with role-based permissions and secure routing
- Implemented data tables with search, filter, sort, and pagination handling 10K+ records
- Integrated KPI analytics with chart visualizations for operational insights

Job Recruitment Portal — Salesforce CRM

- Developed end-to-end recruitment system managing candidates, roles, and application lifecycle
- Automated workflows using Apex triggers and classes; optimized data retrieval with SOQL
- Designed scalable object relationships and data models for enterprise-grade CRM

Education

B.Tech in Computer Science, REVA University
CGPA: 8.6/10

2023 – 2027

Achievements & Certifications

- **Winner** — Datathon '25, REVA University
- Oracle Databases for Developers Foundations
- Infosys Introduction to Cloud Computing
- Simplilearn ReactJS for Beginners
- freeCodeCamp Responsive Web Design
